

6516205259.txt

I am an over the road truck driver and have used the instant weather and traffic channels to help avoid traffic jams and to keep track of bad weather. I believe I should be able to continue to receive these channels and I should be able to hear what areas to avoid. When I was in NY recently a major road was blocked and by listening to my XM I was able to avoid the area and not be stuck in a traffic jam. Since receiving my XM that is the only radio I listen to and should not be told that because of that I can't get weather or traffic. It's the best thing going. I respectfully urge you to reject NAB's petition 04-160. Thank you for your time.
